(54) Title: **DIAGNOSTICS AND THERAPEUTICS FOR DISEASES ASSOCIATED WITH GROWTH HORMONE SECRETAGOGUE RECEPTOR (GHS)**

(57) Abstract: The invention provides a human GHS which is associated with the cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases like COPD and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation. The invention also provides assays for the identification of compounds useful in the treatment or prevention of cardiovascular diseases, disorders of the peripheral and central nervous system, respiratory diseases like COPD and asthma, hematological diseases, cancer, gastro-intestinal diseases and inflammation. The invention also features compounds which bind to and/or activate or inhibit the activity of GHS as well as pharmaceutical compositions comprising such compounds.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/EP 03/02688

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☒ Claims Nos.: -
because they relate to subject matter not required to be searched by this Authority, namely:
Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery: claims 2-3
Rule 39.1(iv) PCT - Diagnostic method practised on the
2. ☒ Claims Nos.: -
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

1-26 (in part)

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
☐ No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.1

Claims Nos.: -

Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery: claims 2-3

Rule 39.1(iv) PCT - Diagnostic method practised on the human or animal body: claim 18

Rule 39.1(iv) PCT - Method for treatment of the human or animal body by therapy: claim 26

Continuation of Box I.2

Claims Nos.: -

Present claims 1-26 relate to diseases defined by reference to a characteristic or property, namely to involve the cardiovascular system. Present claims 19, 20 and 24-26 furthermore relate to compounds defined by reference to a desired characteristic or property, namely to bind to or modulate the activity of the type 1a growth hormone secretagogue receptor (GHS receptor).

The claims cover all diseases and compounds having said characteristics or properties, whereas the application provides support within the meaning of Article 6 PCT and disclosure within the meaning of Article 5 PCT for only a very limited number of such diseases and compounds. Independent of the above reasoning, the claims also lack clarity (Article 6 PCT). An attempt is made to define the diseases and compounds by reference to a result to be achieved

The search was therefore restricted to the following subject-matter:

cardiovascular diseases referred to in claims 1-26: heart failure, myocardial infarction, ischemic diseases, arrhythmias, hypertensive vascular diseases, peripheral vascular diseases and atherosclerosis (as defined on pages 55-57 of the description).

compositions referred to in claims 19, 20 and 24-26: ghrelin analogues, antibodies and antisense polynucleotides.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for cardiovascular diseases

2. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for disorders of the peripheral nervous system

3. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for disorders of the central nervous system

4. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for respiratory diseases

5. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for haematological diseases

6. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for cancer

7. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for gastrointestinal diseases

8. claims: claims 1-26 (in part)

Therapeutic and diagnostic use of GHS receptor for inflammation
